In January 1951, East Germany shipped 110,000 tons of various types of reparations goods to the USSR. Reportedly, this figure is based on the records of the German Democratic Republic's Reichsbahn Directorate. Included in the shipments were 30,000 tons of potash and approximately 35,000 tons of coal.

At present, 28,000 trucks and 250 of East Germany's best freight locomotives are being used for reparations shipments.
